

ESG ANNUAL REPORT 2023

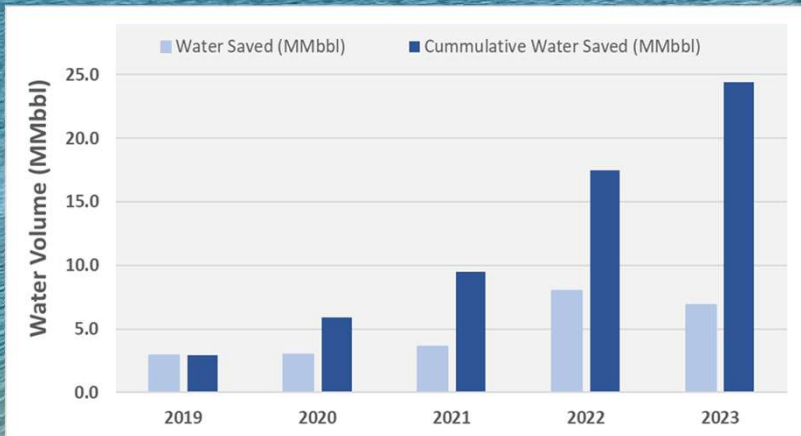

RET is committed to ethical operations and focuses on conducting business in an environmentally, economically, and socially responsible manner.

We are dedicated to identifying technologies, products and services that help the energy industry become more efficient and environmentally friendly.

We help our customers protect water resources and reduce GHG emissions.

We specialize on water conservation and reuse.

WaterSavr O&G™ helped our clients in the Permian save an estimated 8 MM bbl (336 MM gal.) of water in 2023

ResEnTech's Solar-Powered Automatic Dispensers avoided over 2,500 trips to water pits in 2023

We comply with all HSE regulations, applicable to us, of the industries where we work and of our customers.

We maintained our record of **zero accidents** since the forming of our company in 2015.

GHG Emissions Records‡:

2023: 7.19 Metric tons (Scope-1: 7.19 M tons; Scope-2: 0 M tons)

2022: 4.70 Metric tons (Scope-1: 4.70 M tons; Scope-2: 0 M tons*)

2021: 4.22 Metric tons (Scope-1: 1.83 M tons; Scope-2: 2.39 M tons)

2020: 2.91 Metric tons (Scope-1: 0.55 M tons; Scope-2: 2.36 M tons)**

* [Switched to 100% wind and solar electricity provider]

**[Scope-1 reductions in 2020 attributable to COVID travel restrictions]

We proudly support UNICEF, Living Water International, and The Nature Conservancy for their water initiatives in under-developed societies and in nature.
